GNED-102: netTerrain Administrator

Course Overview

A netTerrain Power User can modify any data in the project (the end user work area) but is also tasked with managing catalog settings and their associated object types, such as nodes, devices, racks, cards and links. Administrators for the netTerrain application are tasked with managing users, groups and other system settings. You are the gatekeepers oforder and sanity in the documentation universe.

The duration of this course is 2 days.

Assumptions

This guide assumes that users have basic knowledge of browser navigation and general computer and networking knowledge. A basic knowledge of netTerrain functions, such as navigating diagrams and working with objects is also preferred (in case users start babbling about diagram filters or displayed fields and you don't want to have that deer-in-the-headlights look). When in doubt, just mumble.

Course Materials

For training at Graphical Networks facilities we provide all necessary materials. For on-site training Graphical Networks may request students to bring a laptop. In addition, on-site training requires a room equipped with a large monitor or space for a projector as wellas internet connection.

Resources

The netTerrain_Power_User_Guide_9.1 and netTerrain_Admin_Guide_9.1 documents will serve as the basis for the training course. In addition, content from other guides (also available from the customer support portal at https://graphicalnetworks.zendesk.com) maybe used at times throughout the training course.

Chapter #	Title	Topic
1	Catalog basics	Accessing the catalog
		Summary group views
		Object Types
		Categories
2	Node Types	Nodes vs Smart Objects
		Managing Node Types
		Creating Node Types
3	Link Types	Managing Link Types
		Creating Link Types
		Outside Plant Types
4	Smart Objects	Racks
		Smart Devices
5	User and Group Management	Managing Users
		Managing Groups
		Managing Permissionsards
