

netTerrain's Collector

Easy Peasy Automatic Network Mapping & Discovery

Beautiful, detailed, and real-time diagrams of your network are just a few clicks away. netTerrain's Collector (a standard feature in netTerrain) includes a network discovery engine that makes automatically discovering your networks so easy you can literally click, walk away, get a coffee or go home for the day, and still discover the network.

1. Deploy

- Deployment is ridiculously simple: the Collector's a light-weight application that can be deployed anywhere

2. Connect

- Connect to your network tools in minutes with pre-built connectors to Solarwinds Orion, Service Now, Broadcom Spectrum, VMWare VCenter, AWS, and more

3. Discover

- Automatically discover your devices (plus data, status, properties), custom MIBs, connections, and more
- Tons of supported protocols: SNMP (with CDP, LLDP), WMI, NMAP

4. Automate

- Your discovered data is automatically depicted in beautiful, pixel-perfect, and detail-rich diagrams... diagrams that make it easy to click, view network, fix, and go home early!
