

2024 netTerrain User Summit*

October 7-10, 2024

Maggiano's, 5333 Wisconsin Ave NW, Washington, D.C.

Day One

Monday, October 7th

This day is optional if you have a basic understanding of netTerrain. A working lunch will be provided for netTerrain training.

10:00 Doors open for Students
10:00 - 11:00 Student setup
11:00 - 17:00: netTerrain basic training and certification
12:00 Lunch will be served.
19:00 Meetup

Day Two

Tuesday, October 8th

07:45: Breakfast, check-in
09:00 - 09:30: Meet and greet, agenda
09:30 - 10:00: Graphical Networks news update
10:00 - 12:00: Version 10 (beta) unveiling
12:00: Lunch
13:30: netTerrain roadmap
14:00: Customer success presentation 1
14:45: Coffee & snack break
15:15: Customer success presentation 2
16:15: Beta program, Lootbox rewards, other benefits
16:45 Closing thoughts, next meeting
17:00: Cocktail reception, appetizers

Day Three
Wednesday, October 9th
Certifications (Part 1)

08:00: Breakfast

09:00: Morning session (choose one):

- netTerrain Catalog Modeling & Administration
- Automation with Integrations Using the netTerrain Collector
- Fiber & Circuit Management Using netTerrain OSP

Workshops:

- One-on-One Interactive Workshop - 09:00 - 10:00
- One-on-One Interactive Workshop - 10:00 - 11:00
- One-on-One Interactive Workshop - 11:00 - 12:00

12:00: Lunch

13:30: Afternoon session (choose one):

- Advanced Data Center Infrastructure Management Using DCIM
- netTerrain SNMP, WMI & SSH Discovery

Workshops:

- One-on-One Interactive Workshop - 13:30 - 14:30
- One-on-One Interactive Workshop - 14:30 - 15:30
- One-on-One Interactive Workshop - 15:30 - 16:30

Day Four
Thursday, October 10th
Certifications (Part 2)

08:00: Breakfast

09:00: Morning session (choose one):

- netTerrain Catalog Modeling & Administration
- Fiber & Circuit Management Using netTerrain OSP
- Creating Dashboards & Reports in netTerrain (Pt. 1)
- netTerrain REST API Training (Pt. 1)

12:00: Lunch

13:30: Afternoon session (choose one):

- Advanced Data Center Infrastructure Management Using DCIM
- Creating Dashboards & Reports in netTerrain (Pt. 2)
- netTerrain REST API Training (Pt. 2)

Workshops:

- One-on-One Interactive Workshop - 13:30 - 14:30
- One-on-One Interactive Workshop - 14:30 - 15:30
- One-on-One Interactive Workshop - 15:30 - 16:30

Certification Course Descriptions:

netTerrain Users Summit 2024

- **netTerrain Basic Training and Certification**

Get a handle on the basics of netTerrain in this training designed for any end-user role - from read-only to editor. This course includes an intro to netTerrain, an overview on navigating the system, and covers working with diagrams and objects.

- **One-on-One Interactive Workshop**

Maximize netTerrain's benefits with a personalized, one-on-one workshop led by one of our in-house netTerrain experts. Get project feedback and learn how you can better optimize and tailor netTerrain to your organization's specific needs.

- **Fiber and Circuit Management Using netTerrain OSP**

Get a solid grasp on managing your fiber plant and circuits using netTerrain OSP. This course will show you how you can get a complete fiber inventory at your fingertips so you can plan better for expansions, simplify circuit management, save time, and minimize trips to the field.

- **netTerrain Catalog Modeling and Administration**

Learn how to model devices and manage inventory using netTerrain's custom modeling tool and dive into the administration console. This course covers both creating custom devices on-the-fly and an in-depth look at the netTerrain administration console.

- **Advanced Data Center Infrastructure Management Using DCIM**

Gain a deeper understanding of how you can use netTerrain DCIM to make your data center more efficient. This course will teach you how to edit project data and manage devices, racks, project data, untangle cabling spaghetti, and more.

- **Automation with Integrations Using the netTerrain Collector**

Learn how you can easily connect netTerrain with other apps and tools using netTerrain's discovery engine, the Collector. This course will help you take advantage of netTerrain's pre-built integrations to visualize and unify various tools your team, or other departments, may be using.

- **netTerrain SNMP, WMI & SSH Discovery**

Save hours of manual work and get the diagrams you need in clicks. This course will show you how to automatically find and add your network objects to your project using netTerrain's built-in discovery features.

- **Creating Dashboards & Reports in netTerrain**

Grasp the fundamentals of developing dashboards and reports to simplify decision-making. This 2-part course (consisting of a same-day morning and afternoon session) teaches you how to take advantage of netTerrain's straightforward, management-style reporting and dashboards to gain a deeper understanding of your assets, their utilization, and overall infrastructure layout.

- **netTerrain REST API Training**

Learn to connect netTerrain with other tools and apps, no prior coding knowledge required. This 2-part course (consisting of a same-day morning and afternoon session) teaches you how to tackle custom integrations and get more done using netTerrain's REST API.
