

2026 netTerrain Users Summit*

October 12-14, 2026 (Preliminary Outline*)

Las Vegas

Day One

Monday, October 12

08:00 - 09:00 Breakfast
09:00 - 09:45 Graphical Networks: State of netTerrain
09:45 - 10:30 User Presentation #1
10:30 - 10:45 Coffee/Snack Break
10:45 - 11:15 TBD
11:15 - 12:00 User Presentation #2
12:00 - 13:00 Lunch
13:00 - 14:30 netTerrain v11 Introduction
14:30 - 15:15 Customer Support & Long-term Success Forum
15:15 - 16:15 User Adoption & AI Panel
16:15 - 16:30 Break
16:30 - 17:00 Open Discussion
17:00 Cocktail Reception

Day Two

Tuesday, October 13

*Certification Courses + 1:1 Engineer Workshops

Certification Courses (run in parallel by room/track):

8:30 - 12:00 Basic Training Class (3.5 hrs)
9:00 - 12:00 Collector: Discovery, OIDs, Monitoring
9:00 - 12:00 OSP Part 1
9:00 - 12:00 API Class
9:00 - 12:00 Admin Course: Active Directory, SSO, Installation

12:00 - 13:00 Lunch

PM Certification Courses / Half-Day Sessions:

13:00 - 17:00 Certification Courses Continue

13:00 - 17:00 (optional) – Excel Imports (½ day)

1:1 Engineer Workshops:

Available throughout Day 2 (bookable time blocks running alongside certification courses).

Day Three

Wednesday, October 14

***Certification Courses + 1:1 Engineer Workshops**

9:00 - 12:00 PAM

9:00 - 12:00 Power User Guide: Catalogs

9:00 - 12:00 AI Search: Query + Reporting Builder

9:00 - 12:00 OSP Advanced

9:00 - 12:00 Security

12:00 - 1:00 Lunch

13:00 - 16:30 Misc. Certification Courses Continue

13:00 - 16:30 DCIM + Rack Management (PM)

1:1 Engineer Workshops:

Available throughout Day 3 (bookable time blocks running alongside certification courses).

Certification Course Descriptions:*

netTerrain Users Summit 2024

- **netTerrain Basic Training and Certification Course**

Get a handle on the basics of netTerrain in this certification course designed for any end-user role—from read-only to editor. Includes an introduction to netTerrain, system navigation, and working with diagrams and objects.

- **New netTerrain Cloud Monitoring Certification Course**

Learn how netTerrain Cloud can help you monitor and manage your cloud resources. This certification course covers cloud asset tracking, cost monitoring, and reporting to provide better visibility and control of your environment.

- **Fiber and Circuit Management Using netTerrain OSP Certification Course**

Gain a solid understanding of managing fiber infrastructure and circuits using netTerrain OSP. This certification course covers fiber inventory, circuit tracking, and tools to help you plan expansions, simplify management, and reduce field work.

- **netTerrain Catalog Modeling and Administration Certification Course**

Learn how to model devices and manage inventory using netTerrain's catalog tools. This certification course covers creating custom devices and using the administration console to maintain accurate and scalable models.

- **Advanced Data Center Infrastructure Management Using DCIM Certification Course**

Develop a deeper understanding of managing your data center with netTerrain DCIM. This certification course covers rack and device management, project data updates, and tools to help organize and optimize your infrastructure.

- **Automation with Integrations Using the netTerrain Collector Certification Course**

Learn how to connect netTerrain with other systems using the Collector. This certification course covers discovery, integrations, and how to unify data from multiple tools into a single visualized environment.

- **netTerrain SNMP, WMI & SSH Discovery Certification Course**

Learn how you can easily connect netTerrain with other apps and tools using netTerrain's discovery engine, the Collector. This course will help you take advantage of netTerrain's pre-built integrations to visualize and unify various tools your team, or other departments, may be using.

- **netTerrain SNMP, WMI & SSH Discovery**

Save time by automatically discovering and adding network objects into netTerrain. This certification course covers SNMP, WMI, and SSH-based discovery methods to help you quickly build accurate diagrams.

- **Creating Dashboards & Reports in netTerrain Certification Course**

Learn how to build dashboards and reports to support better decision-making. This two-part certification course covers reporting tools, data visualization, and how to gain insights into your assets and infrastructure.

- **netTerrain REST API Certification Course Part One**

Learn how to integrate netTerrain with other tools using its REST API. This two-part certification course covers API fundamentals and practical use cases to help you automate workflows and extend functionality.

- **netTerrain REST API Certification Course Part Two**

Learn how to integrate netTerrain with other tools using its REST API. This two-part certification course covers API fundamentals and practical use cases to help you automate workflows and extend functionality.

- **netTerrain Administration: Active Directory, SSO & Installation Certification Course**

Learn how to configure and manage the core administrative components of netTerrain. This certification course covers installation, Active Directory integration, SSO configuration, and key system settings for secure deployment.

- **Excel Imports in netTerrain Certification Course**

Save time by importing and updating data in bulk using Excel. This certification course covers import templates, object and link creation, and best practices for accurate and efficient data management.

- **IP Address Management (IPAM) in netTerrain Certification Course**

Learn how to manage and track IP address space within netTerrain. This certification course covers subnet organization, IP assignments, and reporting tools to help maintain accurate and reliable data.

- **Security in netTerrain Certification Course**

Understand how to manage access and protect your netTerrain environment. This certification course covers user roles, permissions, authentication settings, and security best practices.

- **One-on-One Interactive Engineer Workshop**

Work directly with a netTerrain expert in a personalized session focused on your environment. This workshop is separate from certification courses and is designed to provide project-specific guidance, answer questions, and help you optimize how you use netTerrain within your organization. You are encouraged to bring your own data, use cases, and questions.
